Net Matters

30 stories - from telegraph cables to data glasses

Translated by Barry Fay

Neue Berliner Beiträge zur Technikgeschichte und
Industriekultur

176 S., 105 Abb., Pb.

16,00 € [D] · 16,50 € [A]

ISBN 978-3-89809-143-5

A life without technical networks? Hard to imagine! Information and communication networks have taken on greater and greater importance in our lives. This book unites 30 historical and contemporary objects which people have used to network among themselves and to exchange information: from the telegraph cable to data eyeglasses. Extraordinary stories from the lives of these “network things” elucidate the cultural and technical background of the networking phenomenon.

Also available: German edition

Netz-Dinge – 30 Geschichten vom Telegrafenkabel bis zur Datenbrille
(ISBN 978-3-89809-143-5)

Publisher: *Stiftung Deutsches Technikmuseum Berlin*

Third volume of the publication series *Neue Berliner Beiträge zur Technikgeschichte und Industriekultur*. This book accompanies the exhibit *Das Netz* at Deutsches Technikmuseum Berlin, the very first exhibit concerning such “Net Matters” in a German museum.
